Commission on English Language Program Accreditation
Digital Certificates Access and Sharing

CEA issues secure and digitally verifiable electronic certificates of accreditation for accredited programs and language institutions. Digital certificates and credentials use blockchain technology to provide verifiable certificates which are accessible 24/7. You can download, print, or digitally share your certificate. CEA digital certificates are verifiable through the Hyperstack platform.

Certificates of Accreditation

CEA accredits site by site and not entire organizations. For each accredited program or language institution, the primary contact on file will receive an email notification from credentials@thehyperstack.com with instructions to download or print from the Hyperstack platform. If the primary contact changes, please notify CEA for the certificate to be reassigned.

CEA issues independent certificates of accreditation for auxiliary locations. Auxiliary locations are not separately accredited and are included within the grant of accreditation of the main branch or branch.

Please address any questions about digital certificates
to Rachel Herman, Accreditation Process and Technology Manager,
at rherman@cea-accredit.org or call CEA at (703) 665-3400.
